

ENCLOSURES

Designed to function as superbly as it looks, the BP case combines appearance and structural integrity to assure that your instruments are properly protected. Composed of modular aluminum extrusions, the BP case is available in a single meter, two meter, or three meter configuration. The standardized extrusions and aluminum panels are securely assembled and textured with a fashionable black wrinkle coating. Furthermore, the back of the BP is especially designed for easy interface with a variety of outputs. Designated casings are equipped with mounting ports for easy and secure connections for Transducers, Analog Output, BCD Output, Relay Output, and RS-232.

- **STRONG STRUCTURAL ENCLOSURE**
- **ONE, TWO, OR THREE METER CASING**
- **BENCH MOUNT DISPLAY**
