

TLV 220 - MANUAL VERTICAL LEVER STAND - 220 LBS

The TLV 220 will accept the standard Cooper mechanical force gages, while providing a convenient, reliable and easy to use means of performing consistent force measurements. Standard compression and tension models both operate with a single downward lever stroke. The unique modular design of this stand allows the force gage mounting plate to be located on either the front of the stand or on the back for virtually unlimited clearance.

- **MAXIMUM 220 LBS LOAD**
- **2" STROKE**
- **MAXIMUM CLEARANCE OF 5"**

DISTANCE METER SPECIFICATIONS

DISPLAY:	Push button for inch/mm, zero set and on/off
RESOLUTION:	0.0005"/0.01 mm
ACCURACY:	±0.001"/±0.03 mm
STROKE:	2"

MODEL NUMBERS:

TLV 220-C Compression/Push
TLV 220-T Tension/Pull

FORCE GAGES NOT INCLUDED WITH TEST STANDS
